EXAMINER'S AMENDMENT

An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it must be submitted no later than the payment of the issue fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Jenni R. Moen on 11/29/06.

Please cancel claims 18-30,32,34.

### Reasons for Allowance

1. Claims 1-17,31,33 will be allowed.
2. The following is an examiner's statement of reasons for allowance.

The prior art references most closely resembling the applications claimed invention are Byers (U.S. 6,975,619) and Cheng (U.S. 6,731,314).

First Byers disclosed network based systems in which a requesting node queries a target node and, in response, the target node provides information regarding its geographic location to the requesting node. However Byers did not disclose, "the first node obtains a geographic location for a third node based on node identification information in the response packet and that the first node transmits geographic-specific information over the network to the second node based on the geographic location obtained" (claims1, 31, 33).

Second Cheng discloses a server is a computer that holds the files for one or more sites. On the one hand, a very large web site may reside on a number of servers that may be in different locations. IBM is a good example; its web site consists of thousand of files spread out over many servers in world-wide locations. However Cheng did not disclose, "the first node obtains a geographic location for a third node based on node identification information in the response packet and that the first node transmits geographic-specific information over the network to the second node based on the geographic location obtained" (claims 1, 31, 33).

Art Unit: 2145

In summary, the Examiner submits that there is no motivation to combine the aforementioned references; therefore, claims 1-17,31,33 have been deemed allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Any inquiry concerning this communication or earlier communication from the examiner should be directed to Adnan Mirza whose telephone number is (571)-272-3885.
